Problematic

Where is the problem ?

1. How to Connect sensors to the best gateway with high QoS [1].

- Decision and optimisation problem.
- Various network acces
- Various configuration of each network acces
- Lake of selection tools

2. How to connect sensors to this gateway with high Security level.

- Technical problem.
- Lake of selective tools
- How to select the **best** access point

3. How to extract knowledge from sensors data [2].
